

Southern Institute for Health Informatics 2010 Conference Digital Wellbeing - For Patients, Caregivers and Citizens Friday 24 September, Portsmouth

Theme: Digital Wellbeing - For Patients, Caregivers and Citizens

In a challenging economic climate and a time of political change, the need for innovation, fresh thinking and practicable solutions is stronger than ever. The conference will explore questions such as:

- How are new models of care evolving?
- What does this mean for continuity of care and information sharing?
- Can personal health records help to empower citizens to improve their wellbeing?
- How can informatics help to integrate healthcare, social care and self-care?
- Can informatics facilitate reduction in operational costs in health and social care?

The conference will address these and related issues and showcase developments (locally, nationally and internationally) that will contribute to improving the wellbeing of patients, caregivers and citizens.

Speakers include:

- **Deborah Jamieson OBE**
Cross Government Head of Health, Work & Wellbeing Strategy Unit : Digital wellbeing - a policy perspective
- **Professor Jeremy Wyatt**
Director of the Institute of Digital Healthcare, University of Warwick : What is the evidence base for digital wellbeing?
- **Professor Martin Severs**
Chair, NHS Information Standards Board; Chair, International Health Terminology Standards Development Organisation: How UK and international health information standards support digital wellbeing
- **Murray Bywater**
Managing Director, Silicon Bridge Research: Whatever happened to European eHealth? A review of the market and current trends
- **Samantha Riley**
Head of the Quality Observatory, South East Coast SHA: Utilising information to support improvements in patient care at lower cost
- **Chris Hawker**
Programme Director, Wessex Health Innovation and Education Cluster: Coordinating the strands - Delivering a new paradigm

Who should attend?

The conference is aimed at healthcare professionals, senior managers and system developers within the NHS and other health and care providers and their suppliers. Academics with research or teaching interests in the above areas will also find plenty to interest them.

Registration

The cost of early registration (bookings made before 1 September) is only £75, which includes lunch.

Infomart

The conference also features an "Infomart". The Infomart is an informal information marketplace area that allows vendors and researchers a low cost method of meeting people and exchanging information.

The conference will be held in the Langstone Conference Centre at the University of Portsmouth.

For more details of the programme, Infomart bookings and a registration form, go to the website
